FEE GEE FRAGRANCE OIL

POSITION STATEMENT GENETICALLY MODIFIED ORGANISMS

We hereby confirm that to the best of our knowledge, that Fee Gee supplied by us does not contain ingredients derived from genetically modified crops, nor have such agents been used during production.

To the best of our knowledge, GMO's are not used in any of our fragrance compounds/ ingredients. Also, as followers of the IFRA Code of Practice, Fragrance Oils are guided by IFRA's statement that to the best of their knowledge GMDI's (Genetically Modified Derived Ingredients) for example essential oils, or other ingredients obtained unchanged from GMO's, are not used as fragrance ingredients.

We are not in a position, however, to make absolute claims such as "GM free" because of the widespread use of genetic technology (again as advised by IFRA).

Eye / Skin Protection

Wear protective gloves/eye protection/face protection

Respiratory Protection

Ensure adequate and ongoing ventilation is maintained in order to prevent build up of excessive vapour and to ensure occupational exposure limits are adhered to. If appropriate, and depending on your patterns and volumes of use, the following engineering controls may be required as additional protective measures: a) Isolate mixing rooms and other areas where this material is used or openly handled. Maintain these areas under negative air pressure relative to the rest of the plant. b) Employ the use of Personal protective equipment - an approved, properly fitted respirator with organic vapour cartridges or canisters and particulate filters. c) Use local exhaust ventilation around open tanks and other open sources of potential exposures in order to avoid excessive inhalation, including places where this material is openly weighed or measured. In addition, use general dilution ventilation of the work area to eliminate or reduce possible worker exposures. d) Use closed systems for transferring and processing this material.

Also refer to Sections 2 and 7.
