# SAFETY DATA SHEET ISOPROPYL ALCOHOL

Commission Regulation (EU) No 2015/830 of 28 May 2015.

#### SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier

Product name ISOPROPYL ALCOHOL

Chemical name PROPAN-2-OL

Product number IPA, 2D S00828

REACH registration number 01-2119457558-25-XXXX

**REACH registration notes**REACH registration only covers products which OQEMA have imported into Europe or

sourced within Europe. If the product is sold directly outside Europe this is not covered under the registration. It is the responsibility of the subsequent importer into Europe to ensure their

volume of product is covered under the REACH regulations.

CAS number 67-63-0

Signal word Danger

Hazard statements H225 Highly flammable liquid and vapour.

H319 Causes serious eye irritation.

H336 May cause drowsiness or dizziness.

Precautionary statements P210 Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No

smoking.

P240 Ground and bond container and receiving equipment.

P241 Use explosion-proof electrical equipment.

P242 Use non-sparking tools.

P243 Take action to prevent static discharges.

P261 Avoid breathing vapour/ spray.

Contains PROPAN-2-OL

Supplementary precautionary

statements

P264 Wash contaminated skin thoroughly after handling. P271 Use only outdoors or in a well-ventilated area.

P280 Wear protective gloves/ protective clothing/ eye protection/ face protection.

P303+P361+P353 IF ON SKIN (or hair): Take off immediately all contaminated clothing.

Rinse skin with water or shower.

P304+P340 IF INHALED: Remove person to fresh air and keep comfortable for breathing. P305+P351+P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove

contact lenses, if present and easy to do. Continue rinsing. P312 Call a POISON CENTRE/doctor if you feel unwell.

P337+P313 If eye irritation persists: Get medical advice/ attention.

P370+P378 In case of fire: Use foam, carbon dioxide, dry powder or water fog to extinguish.

P403+P233 Store in a well-ventilated place. Keep container tightly closed.

P403+P235 Store in a well-ventilated place. Keep cool.

P405 Store locked up.

P501 Dispose of contents/ container in accordance with national regulations.

#### **SECTION 4: First aid measures**

#### 4.1. Description of first aid measures

General information In all cases of doubt, or when symptoms persist, seek medical attention. Show this safety data

sheet to the doctor in attendance Get medical attention.

**Inhalation** Remove person to fresh air and keep comfortable for breathing. Get medical attention. If

breathing stops, provide artificial respiration.

**Ingestion** Do not induce vomiting unless under the direction of medical personnel. If person is

conscious, rinse mouth with water. Give plenty of water to drink. Never give anything by

mouth to an unconscious person. Get medical attention.

**Skin contact** Wash skin thoroughly with soap and water. Get medical attention.

Eye contact Get medical attention immediately. Separate eyelids, wash the eyes thoroughly with water (15

minutes). Get medical attention.

**Protection of first aiders**No information available.

## 4.2. Most important symptoms and effects, both acute and delayed

General information The most important known symptoms and effects are described in the labelling (section 2.2)

and section 11

InhalationNo information available.IngestionNo information available.Skin contactNo information available.

Eye contact No information available.

#### 4.3. Indication of any immediate medical attention and special treatment needed

Specific treatments No information available.

Notes for the doctor No information available.

## SECTION 5: Firefighting measures

## 5.1. Extinguishing media

Suitable extinguishing media Foam. Carbon dioxide (CO2). Dry powder. Water spray. Alcohol-resistant foam. Dry

chemicals. Cool containers with water spray

Unsuitable extinguishing

media

Do not use water jet as an extinguisher, as this will spread the fire.

#### 5.2. Special hazards arising from the substance or mixture

## ISOPROPYL ALCOHOL

Specific hazards Flammable liquid May release vapours that form flammable mixtures at or above the flash

point. Empty containers or liners may retain some product residues and hence be potentially hazardous. Do not pressurise, cut, weld, drill, grind or otherwise expose containers to heat or sources of ignition. Prevent entry into waterways, sewers, basements or confined areas May

evolve oxides of carbon (COx) under fire conditions.

Hazardous combustion

products

No information available.

5.3. Advice for firefighters

Protective actions during

firefighting

Cool container with water spray from a safe distance

Special protective equipment for firefighters

Wear positive-pressure self-contained breathing apparatus (SCBA) and appropriate protective clothing.

#### SECTION 6: Accidental release measures

#### 6.1. Personal precautions, protective equipment and emergency procedures

Personal precautions Wear protective clothing as described in Section 8 of this safety data sheet. Avoid breathing

vapours, mist or gas. Provide adequate ventilation. Remove all sources of ignition. Keep unnecessary and unprotected personnel away from the spillage. Immediately evacuate personnel to safe areas. Beware of vapours accumulating to form explosive concentrations.

Vapour can accumulate in low areas.

For non-emergency personnel This material may be hazardous by contact, do not attempt to clean up the spill. Call trained

emergency responders immediately. Clean up only to be done by Emergency

responders/personnel. Restrict access to area as appropriate until clean-up operations are

complete. Use appropriate personal protective equipment.

**For emergency responders** Use appropriate personal protective equipment during clean-up Stop leak if safe to do so.

Provide adequate ventilation. Eliminate all sources of ignition. Do not touch or walk into spilled material. Restrict access to area as appropriate until clean-up operations are complete. Ensure clean-up is conducted by trained personnel only. Have emergency equipment (for fires, spills, leaks, etc.) readily available. Notify appropriate government, occupational health

and safety and environmental authorities.

## 6.2. Environmental precautions

**Environmental precautions** Prevent further leakage or spillage if safe to do so. Prevent entry into drains. Avoid the

spillage or runoff entering drains, sewers or watercourses. Inform the relevant authorities if

environmental pollution occurs (sewers, waterways, soil or air).

## 6.3. Methods and material for containment and cleaning up

**Methods for cleaning up** Small Spillages: Soak up spill with absorbent material. Place residues in a suitable, covered,

properly labelled container. Wash affected area. Large Spillages: Contain liquid using absorbent material, by digging trenches or by diking. Reclaim into recovery or salvage drums or tank truck for proper disposal. Wash site of spillage thoroughly with water. Contact an approved waste hauler for disposal of contaminated recovered material. Dispose of

contents/container in accordance with local regulations.

## 6.4. Reference to other sections

Reference to other sections See Section 7 for information on safe handling. Wear protective clothing as described in

Section 8 of this safety data sheet. See Section 11 for additional information on health hazards. See Section 12 for additional information on ecological hazards. Collect and dispose

of spillage as indicated in Section 13.

## SECTION 7: Handling and storage

## ISOPROPYL ALCOHOL

#### 7.1. Precautions for safe handling

Usage precautions Provide adequate ventilation. Do not breathe vapours. Do not breathe gas. Do not breathe

dust. Container must be kept tightly closed when not in use. Only store in correctly labelled containers. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Use personal protective equipment as required. Protect against

electrostatic charges.

Advice on general occupational hygiene

Avoid contact with eyes and skin. Do not eat, drink or smoke when using this product. Eye wash facilities and emergency shower must be available when handling this product. Good personal hygiene procedures should be implemented. Wash skin thoroughly after handling. Take off immediately all contaminated clothing and wash it before reuse.

## 7.2. Conditions for safe storage, including any incompatibilities

Storage precautions Store in tightly-closed, original container in a dry, cool and well-ventilated place. Containers

which are opened must be carefully resealed and kept upright to prevent leakage. Only store in correctly labelled containers. Keep away from heat, hot surfaces, sparks, open flames and

other ignition sources. No smoking. Do not store with oxidising agents.

Storage class No information available.

7.3. Specific end use(s)

Specific end use(s) The identified uses for this product are detailed in Section 1.2.

**Usage description** No information available.

#### 8.2. Exposure controls

## Protective equipment

ventilation.

Appropriate engineering controls

Personal protection

No information available.

Eye/face protection

Personal protective equipment for eye and face protection should comply with European Standard EN166. Chemical splash goggles and face shield.

Emergency shower and eye wash facilities should be readily available Provide adequate

Hand protection

To protect hands from chemicals, gloves should comply with European Standard EN374. Wear protective gloves. Gloves must be inspected prior to use. Gloves should be discarded and replaced if there is any indication of degradation or chemical breakthrough. Use proper glove removal technique (without touching glove's outer surface) to avoid skin contact with this product. Dispose of contaminated gloves after use in accordance with applicable laws and good laboratory practices. Wash and dry hands For full contact: Nitrile rubber. Minimum layer thickness: 0.4mm breakthrough time >480mins For splash contact: Nitrile rubber. Minimum layer thickness: 0.2mm Breakthrough time 60 min (EN374) If used in solution, or mixed with other substances, and under conditions which differ from EN 374, contact the supplier of the CE approved gloves. This recommendation is advisory only and must be evaluated by an industrial hygienist and safety officer familiar with the specific situation of anticipated use by our customers. It should not be construed as offering an approval for any specific use scenario.

Other skin and body protection

Chemical resistant boots should comply with European standard EN345. Body protection must be chosen depending on activity and possible exposure, eg. apron, protecting boots, chemical-protection suit (according to DIN-EN 465). Impervious clothing - apron/boots. Flame retardant antistatic protective clothing. The type of protective equipment must be selected according to the concentration and amount of the dangerous substance at the specific workplace

Hygiene measures

Avoid contact with skin, eyes and clothing Do not eat, drink or smoke when using this product. Eye wash facilities and emergency shower must be available when handling this product. Good personal hygiene procedures should be implemented. Wash skin thoroughly after handling. Take off immediately all contaminated clothing and wash it before reuse. Keep away from foodstuffs, beverages and feed.

## ISOPROPYL ALCOHOL

**Respiratory protection** Where risk assessment shows air-purifying respirators are appropriate use a full-face

respiratior with multi purpose combination or type ABEK (EN 14387). If ther respirator is the

sole means of protection, use a full-face supplied air respirator. use respirators and

components tested and approved under appropriate government standards such as NIOSH or
